

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

(The following two sentences are in Spanish relaying information on the importance of this notice. Translated to English, it would read as follows: [This notice contains important information regarding your drinking water, please read the Spanish notice if it is included. If the Spanish notice is not included, please contact the water system and ask for a copy.]

Este informe contiene información muy importante sobre su agua potable.
Tradúzcalo o hable con alguien que lo entienda bien.

MONITORING REQUIREMENTS NOT MET FOR Santa Cruz County Fairgrounds

Our water system failed to monitor as required for drinking water standards during the past year and, therefore, was in violation of the regulations. Even though this failure was not an emergency, as our customers, you have a right to know what you should do, what happened, and what we did to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the first six months of 2022, we failed to conduct standard lead and copper tap monitoring and water quality parameter monitoring and therefore, cannot be sure of the quality of our drinking water during that time. During this time, Santa Cruz County Fairgrounds did not comply with the lead action level.

What should I do?

- There is nothing you need to do at this time.
- The table below lists the contaminant(s) we did not properly test for during the last year, how many samples we are required to take and how often, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required Sampling Frequency	Number of Samples Taken	When All Samples Should Have Been Taken	When Samples Were or Will Be Taken
Lead and Copper Tap Samples	Once per six months	none	June 30, 2022	Were Taken on August 22, 2022
Water Quality Parameter Monitoring	Once per six months	none	June 30, 2022	Will be taken by Sept. 22, 2022

- If you have health issues concerning the consumption of this water, you may wish to consult your doctor.

What happened? What is being done?

Our system is actively working with the State Water Resource Control Board to comply with the required monitoring schedule by completing the required directives and drawing the required samples.

We plan to take the remaining required samples soon, as described in the last column of the table above

For more information, please contact Dave Kegebein at 2601 East Lake Ave. Watsonville, CA. 95076.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this public notice in a public place or distributing copies by hand or mail.
